

PETRA LOSSEN FINE ART

Kunst, Shop & Podcast

You can almost sit, stand and lie on this easel yourself. Because this professional studio easel is extremely stable and versatile. It is made of high-quality beech wood.

This easel offers maximum flexibility, the stretcher frames lie flat and very stable. The painting angle (inclination) is infinitely adjustable from vertical to horizontal - ideal for working with liquid paints or putties.

The lower stretcher frame shelf is height-adjustable via a locking rail, the stretcher frame remains clamped in the horizontal position when the alignment is changed. The easel has a total of three stretcher holders: the two at the bottom and at the top are for stretcher frames over 100 cm in portrait format and offer very high stability with the wide support. The middle removable stretcher frame holder is necessary for all smaller formats - these can be clamped both above and below. Stable stand due to large H-foot 60x65 cm on four lockable castors for quick change of position.

The special feature of this easel: the wide stretcher frame limiters at the top and bottom as well as the large wooden surfaces ensure an extremely stable and wobble-free hold of the stretcher frames!

The easel comes as a kit with instructions and the necessary tools. The assembly time is max. 45 minutes. The detailed views shown are very helpful for the assembly.
