

PETRA LOSSEN FINE ART

Kunst, Shop & Podcast

Function and form in perfection: stable and versatile professional studio easel made of high-quality dark-stained beech wood.

This easel offers maximum flexibility, the stretcher frames lie flat and very stable. The painting angle (inclination) is infinitely adjustable from completely vertical to horizontal - ideal for working with liquid paints or putties. The very large lower stretcher is height-adjustable via a large clamping screw. The stretcher frame rests on raised rubber pads at the top and bottom to allow painting right up to the edge.

Stable stand due to large H-foot 60x60 cm on four lockable castors for quick change of position.

The special feature of this easel: very elegant and appealing appearance, extremely high quality workmanship - and at the same time robust and highly flexible in use.
